turtle

Bumble Bee

Sassafras leaves

Mayhaw berries

moss

Moss

I am a fungus. I live on trees but do not harm the trees. I was once used as mattress stuffing. I was mixed with mud and used in the construction of houses in the early days. I am very strong and resilient.

Crawfish

I am a crustacean. I swim backwards. I molt. I have gills and lungs. I am very tasty in etouffe.

Alligator

I am a reptile. I have many sharp teeth. My babies hatch from an egg and I take care of them for a longer period of time than any other reptile. I swim in water and crawl on land. I am dangerous to man.

Box Turtle

I am a reptile. I live on land. I cannot swim. My babies hatch from an egg. My eggs look like ping pong balls. I hibernate in the winter. I eat snails, slugs, roots and leaves.

Butterfly

I was once a caterpillar. I lived in a challis for a while. I am now very beautiful. I can fly.

Mayhaw berries

I grow on a tree in wet areas. I fall off the tree in the spring. People scoop me up in nets and make me into a delicious jelly. I am red when ripe. I am a berry.

Swamp Rabbit

I am mammal. I am very large for my species. I can run 48 miles an hour. I can also swim. I can hide in water for hours with only my nose sticking out of the water. I have long ears. I live in the swamp. I have brown fur.

Ladybug

I am an insect. I am a beetle. I eat aphids. Farmers like to have me in their garden. I was taken into space in 1999 for reasons of effects of gravity. I am red with black dots and I have wings.

Cypress Knee

I grow on the root of the cypress tree. It does not seem to hurt the tree if I am removed. Many people make lamps and candlesticks using me. I can be small or grow tall.

Spider

I am an arachnid. I have 8 legs. I spin a web. Some of us can actually walk on the top of water. Some of us are poisonous such as the Black Widow and the Brown Recluse.

Bumble Bee

I can fly. I drink nectar from flowers. The male will not sting. You can watch me on a flower and I will not attack you. I am very fuzzy. I am yellow with black stripes.

Sassafras Tree

I am the only tree that has three complete different leaf shapes. When the colonies were first formed, the oil from this tree was part of the charter. England demanded that the colonies supply them with the oil. I was used to make candy and cosmetics. Today, I am used as a medicinal tea. My root has a strong odor. My leaves are crushed and used as file' on gumbo.
